Franklin brings a breadth of applied experience and personal commitment to Northern Utility Maintenance. Born and raised in the Yukon, Franklin has a 10-year background in the water and wastewater industry, with 6 of those years with N.U. Maintenance, as a Circuit Rider Trainer and apprentice. With his carpentry and housing building maintenance background, Franklin brings demonstrated skills in applied trades, teamwork, communication and problem solving to the company. He takes much pride in helping hands-on with municipal and private operators, to provide safe water for public consumption. Respecting and protecting the environment is of the utmost importance to him. Personal growth and continuing education have made his position fulfilling.
